## Overview

CJKOS(Chinese, Japanese, Korean Operation System) is used to enhance the English version of PalmOS to become a multi-language system, supporting Chinese, Japanese and Korean. [Screenshot...](#)

- Supports displaying Chinese, Japanese and Korean words. CJKOS will:
  - Intelligently identify and display simultaneously both Simplified(GB-2312) and Traditional(BIG-5) Chinese words.
  - Intelligently identify and display simultaneously both EUC-JIS and Shift-JIS Japanese words.
  - Display Korean KSC-5601.
- Localizer: Supports a native-language interface for PalmOS. At present, only Simplified and Traditional Chinese interfaces are available. [Screen shots](#).
- Supports the input of Chinese words. The followings input methods are available:
  - For Traditional Chinese: CangJie[sometimes is called Changjei], HongKong CangJie, Easy, ZhuYin, Cantonese, HanYuPinYin, TongYongPinYin, ZhuYin 2, WG PinYin, XuShi, DaYi, Array, Icon Word, Punctuation and Symbol, Japanese Hiragana and Katakana.
  - For Simplified Chinese: WuBiZiXing, PinYin, Double-PinYin, ZhuYin, Cantonese, Shape-code, Zheng-code, Icon Word, Punctuation and Symbol, Japanese Hiragana and Katakana.
  - For Korean: Korean Word, Icon Word, Japanese Hiragana and Katakana.
  - For Japanese: Icon Word, Japanese Hiragana and Katakana.
  - Other Input Methods available on each specific language platform, customized by the users.
- Various Font support:
  - Supports **Standard Font**, **Bold Font**, **Large Font** and **Large Bold Font**.
  - Supports Chinese and Japanese **10X10** small Font.
- Special Font Support:
  - 12X12 **FangSong** and **Kai** Fonts Simplified Chinese.
  - 12X12 **XiMing** and **BiaoKai** Font Traditional Chinese.
  - SUPPORTS HKSCS(Hong Kong Supplementary Character Set ) FONTS (4702), and All of the Traditional Chinese words and 4295 HKSCS words can be input with "HongKong Cangjie" Input Method.
- Phrase Association, Reverse-Association and Phrase Input.
- Supports to directly add or to delete phrases on handheld devices.
- Smart Prioritize Words and Phrases: System can study on itself and put the frequently-used words or phrases in the front of the list.
- Supports the feature of "Icon word", so that icons can be pasted among the characters. It can help to categorize the materials, act as a reminder or note, etc.
- Supports external keyboard: Input Methods can be started on external keyboards. The available external keyboards include GoType keyboard and Palm Portale Keyboard.
- Supports JogDial.
- Match Precisely.
- Translates Chinese address into English.
- Gets the original codes.
- Database manager: Easily delete any unnecessary databases (CJKOS system files), or monitor databases' status.

- Other advanced features:
  - Adjustable spacing between the words.
  - Enhance the word wrap feature.
  - Hide the underlines in the text.
  - Enhance the sorting feature.
  - Enhanced Fonts Select Dialog.
  - Enhanced CJK Date Format.

## System Requirements

**Hardware:** Runs on various versions of Palms and Compatible Devices - PalmPilot, PalmIII, PalmIIIe, PalmIIIx, PalmV, PalmVx, PalmIIIc, PalmIIIxe, Visor, Visor Deluxe, Visor Platinum, Visor Prism, TRGPro, CLIE S300, CLIE S500c, Symbol etc.

**Memory usage:** You can **customize** it as you need. It takes only 190KB of memory to install the Main Program and the 10X10 Simplified Chinese Full font. The amount of the memory needed will vary according to the databases you choose to install. You can easily install any new databases or delete any databases no longer in use by using the "CJKOS Database Manager ". **It is strongly recommended that you only install the required databases.**
